

Do you have fibromyalgia and are 50 years of age or older?

If yes, you could help us by participating in a research study looking to shape a pain and stress management treatment in patients with fibromyalgia.

- The 4-month study consists of three phone or video conference questionnaires (60-75 minutes), a feedback survey (15 minutes), 21 days of compensated 5-10-minute surveys, and an additional 6-8-week period of 5-minute daily check-ins on a website called BrightOutcome.
- *Some* participants will also complete activities on BrightOutcome totaling approximately 60 minutes each of those 6-8 weeks.
- Eligible participants will be compensated up to \$142:
 - \$25 each for the three 60-75-minute questionnaires
 - \$2 each for the 21 days of 5-10-minute surveys (up to \$42)
 - \$25 for the feedback survey
